Az országházról.

Kerkápoli Károly pénzügyminiszternek a képviselőház január 27-iki ülésén tartott nagyfontosságú beszédéből közlünk néhány jelentékeny részletet.

A bankügyre nézve így nyilatkozik:

Az ipar fejlesztését, a kereskedelem felvirágzását hazánk anyagi jólétének, emelkedésének vitalis feltételének tekintem, és mert ilyennek tekintem s mert tudom mily szükségük van ezeknek rendszeres hitelre, rajtam legalább nem mulik semmi, hogy részükre rendszeres pénzforgalom biztosítsassék, önálló és oly szilárd alapon, mint a miénre ezt ez idő szerint fektetni csak lehet. Szolgáljon ez a t. háznak tájékoztatásul, és ha lehet megnyugtatósan (Zaj balfelől) a jelenleg folyamatban levő tárgyalásoknak irányára felett.

Az adókat illetőleg mondja:

Eddig igazuk lehetett azoknak, a kik azt mondták, hogy a nemzet adóval tud van terhelve, most már azonban lehet ez országtól, melynek adóképesége 30%-on túl emelkedett, földje csak a vasutak mentén fél milliárd értékkel szaporodott, némi erőfeszítést is e téren igényelni. A társadalmi életnek, az adórendszernek alapja nálunk a földművelés. A még e héten bemutatandó adó-cataster-törvényjavaslat e téren csak egy lépés; gondja lesz rá, hogy többiek nyomon kövessék.

A házadót illetőleg meggyőződésem hogy itt apróbb igazításokon kívül gyökeres változtatásra nem lesz szükség. Az adó tétel magasságának megmérése akkor lesz idején, mikor a többi adónemeknél az már megállapított, mert akkor tűnik ki, hogy összhangzatos-e az azokkal vagy nem.

A mi illeti a másik két direct adónemet, a személy kereseti és jövedelmi adót, azt hiszem, hogy e tekintetben legnagyobb a fejletlenség direct adóink rendszerében. Azt hiszem, és ez erős meggyőződésem, hogy itt gyökeres teljes átalakításra van szükség, oly átalakításra, mi egyfelől biztosítsa azt, hogy az idetartozó minden jövedelem kellőleg megróvható legyen, hogy annak adója kellő arányt mutasson mind az idetartozó

ágak közt, mind pedig remben a többi reáladókkal: a föld és házadóval. — Így megfelelőleg berendezendő kereseti adó, melyet ha így tetszik osztályadóknak is nevezhetünk, van hivatva, élelményem szerint az e téren való tökéletlenségek elhárására. Minő lesz az? ennek fejtegetését, azt gondolom nem várja tölem most senki. Akkor lesz ez helyén és lején, ha beterjesztem a javaslatokat. Csak egyet mondom. Meggyőződésem szerint három momentum van, mi itt szem elől téveszteni nem lehet, sőt szem előtt tartani kell egyaránt. Az első az individualis munka és annak gyümölcse, értem úgy a különös qualificatio által nem gyamolított közönséges munkát mint azt, mely különös qualificatio, sajátosság irányu képzés, az intelleccialis erő által gyamolítottat, azt mely némelyeket valamely specialis téren egyebeknél alkalmasabbá teszi keresetre. — Másik a töke, mely az embereket arra vszi, hogy ne csak a maguk testi és szellemi erejével, le töke segítségével megszerzett eszközökkel, gépekkel stb. dolgozzanak, sőt más embereknek az ő céljoka biztosított munkájából is hasznot huzzanak. Az első a munkadíj, a másik a hasznosított töke jövedelme.

Ezekhez járul utóbbi esetben a vállalkozó haszna; három együtt: az individualis testi és szellemi munka, a tökenyeremény és a vállalkozási díjak, mi e téren figyelemben tartandó. Felbégásam szerint jó azon adórendszer, mely ezen három alap kellő megadóztatását, nem csak eszközölni akarja, hanem a megfelelő támpontok megtalálása által bírja is. Olyan adórendszer, mely ezek egyikét vagy másikat figyelmen kívül hagyja, vagy ha célba veszi is, de a megfelelő támpontokat meg nem találja, célját itt is, ott is többé-kevésbé, elhibázza, nem kielégíti.

A mi egyéb adónemeinket illeti, nem tagadhatom, hogy daczára annak, hogy valami nagy tökélyre vittnek adórendszerünket nem tartom, annak egyik lényeges sarkkövét sem vélem ez idő szerint mellőzhetőnek.

Tehát a jövedékek földadását, a fogyasztási adók vagy azok valamelyikének megszüntetését, a bélyeg és illetékek mellőzését olyan dolgoknak tartom, melyek

nekem nem is vágyaim, de melyekről értem, ha valakinek vágyai, de ez idő szerint sem egyiket sem másikat nem tartom megszüntethetőnek. Egyiknek, mint másoknak tökéletesítése azonban, s a közigazgatási érdekekkel nagyobb összhangzatba hozatala indicalva van.

Beszédét az ellenzékhez intézett felszólítással eképvégzi:

Engedjék meg a t. képviselő urak a tuloldalán, hogy ennek végeztével egy versenyre hívjam fel önöket, a jövő alkotása tekintetében térjunk a munka terére, legyen a miénk a kezdeményezés kötelessége, legyen az önöké is az előmozdítás szép szerepe. És a szerint itéljen meg bennünket a jövő s a nemzet, a mint úgy az egyik, mint a másik e téren a maga kötelességet teljesítette. (Helyeslés jobbfelől.) Mi magunk sikeresen nem működhetünk, miénk csak a megindítás, miénk csak a kezdeményezés kötelessége és lehetősége. Az előrehaladás, a gyors és sikeres munka, csak összhangzó törekvéseknek lehet eredménye. Ezen összhangzó törekvést kérjük ügyfeleinktől, várjuk és reméljük, de kérjük a nemzet érdekének nevében önöktől és politikai ellenfeleinktől is. Várjuk ezt a politikai ellenfelektől, mert bármi legyen is az önök politikai nézete, meg vagyok arról győződve, hogy a nemzet anyagi emelkedése nem kevésbé fekszik az önök szívében mint fekszik a magunkén. Mórítz Pál t. képviselő ur azt mondá nekem, hogy nem kételkedik az én igyekezetemben, az én munkaképességemben és szorgalmamban, de az eredmény hiánya úgy mond, ellenem szól. Ha Mórítz képviselő ur jelen volna kérném őt, ne itéljen mindig és mindenben az eredmény után, mert igazságtalan lesz, nem én értem, de egyéb okokból. Az a gazda, a kinek 1863-ban az aszály, 1866-ban a fagy elvette mindenét, ez nem volt képes eredményt mutatni, és ha valaki elítélte őt nem volt irányában igazságos. Az oppositio mint ilyen, állásának természeténél fogva soha sem lesz képes eredményt mutatni fel. Ha az eredményből itélnék meg munkásságát, el kellene azt itélnünk. Én nem itélem el, mert állása, természete lehetetlenné teszi az

Az ókori népek közt a phöniciék voltak a legelsőek, kik a tengeren jelentékeny utat tettek. Kezdetben csak a veres és közép tenger szigetei között mertek evezni, de később bejárták a nagy óceánok minden akkor ismeretes tájait. Ki van derítve, hogy phönícia lakói, valamint az egyiptomiak is már az egész Afrikát körülhajózták, sőt némelyek azt állítják, hogy már a nagy amerikai contingenset is érintették volt. — Magok a chinaiak is, valamint a miveltség egyéb ágai-ban, úgy a hajózási ügyességben is magas fokon álltak. Ezek fölülmulták a phöniciéket az által, hogy azok előtt már évezredekkel tudták használni a vitorlát, az iránytűt sat. és roppant kiterjedésű hajókat tudták készíteni.

Julius Caesar római történetíró irataiban olvassuk, hogy a cimberék és celták is bátran, minden félelem nélkül szállottak ki a nyílt tengerre; továbbá már tudták az égi testeket: a napot, holdat és csillagokat vezér gyanánt használni s felleget vagy borult idő alkalmával madarak — főleg holló vagy varju — repülése után vették útjuk irányát.

A biblia azt írja Nóc bárkájáról, hogy az 300 rőf hosszú, 50 rőf széles és 30 rőf magas volt; 3 emeletből állott, tehát már valóban elég tekintélyes vízijármű volt. Mégis mi volt az az egyiptomi Ptolemaeusok hajóhoz képest? (Ezek Krisztus előtt 323-tól 221-ig uralkodtak.) II. Ptolemaeus király, kinek a tengeren 4000 hajóból álló kereskedő-hajórajja volt, hajó-óriásokat épített, melyeknek a szokásos öt vagy hét sor evező helyett 30 sor evezőjük volt s melyek tulajdonkép soha

sem használtattak, hanem csakis arra szolgáltak, hogy a világ bámulását felköltsék és fogalmat nyujtsanak az ő tömérdek gazdagságáról és roppant hatalmáról.

Egy sokkal colossalisabb hajót készítettett II. Hiero syracusai király, hogy azt II. Ptolemaeusnak ajándékozza. A hagyományok szerint két darabban épült; először az elsőt a tengerre bocsátották s úgy rakták fel erre a másikat. Különben e hajó igen fontos épület, mert — miként állítják — ez nyujtott alkalmat arra, hogy Archimedes a csavart (sróf) föl találja melyről már maga így nyilatkozott: „Adjatok a világűrben egy szilárd pontot és én e csavarral kivesszem a világot sarkaiból!” Ez az archimedesi — ugynevezett „végtelen” — csavar valóban egyike a legfontosabb mechanikai eszközöknek, melyet az ipar fölmutatni képes. Amaz óriási hajó építésénél arra szolgált, hogy azon két résznek, melyből a hajó állott, akkor oly nehezen mozgatható és összeilleszhető darabjait csekély erővel és könnyen mozditotta és szilárdan összetartotta. Daczára óriási nagyságának csak husz sor evezőjű volt hanem azért volt benne 47 nagy szoba, ide nem érve e számtalan eleségkamrárt, konyhát, malmot, aklot, hálóhelyet sat., továbbá volt benne egy ivóvíz-medence mintegy 400 akó tartalommal, egy nem kisebb nagyságú halastó és végre 8 harci készlettel felszerelt torony és számos hajtógép, melyek közül a legkisebb is képes volt egy husz fontos gerendát 125 lépésnyire eldobni. Mind a külső, mind a belső berendezés és földszítés megfelelt óriási nagyságának. Valamint földélete, úgy termei is a legszebb szobrokkal és festményekkel volt díszítve; a legtöbb szoba igen értékes fa- és kőbutorokkal ellátva; a földézetten sétatnyok s gyönyörű ligetek voltak készítve szőlő- és borostyánlombokból s tömérdek díszvirágból; továbbá olvasóterem volt berendezve egy gazdag könyvtárral és felséges fürdőhelyiségek egészíték ki e valóban paradicsomi épületet. És gigási nagysága daczára szerencsésen tette meg útját Syrakusától Egyiptomig.

Mégis nem sokáig állott e hajó az első helyen IV. Ptolemaeus király ugyanis egy akkorát készített, melynek 40 sor evezője volt s a mely 300 matróc és 4000 evezőlegényből álló hajószemélyzetten kívül még 3000 teljesen felszerelt harcst, — összesen tehát 7300 embert volt képes egész könnyelmesen befogadni.

A történet által igazolt fennebbi számokkal könnyen összehasonlíthatják olvasóim korunk legóriásibb hajójának — a Leviathanak — nagyságát, mely ke-rekes és csavaros gözhajó egyszersmind. Ezt 1856—58-ig építették a Themsen, Londontól nem messze és 1859 nyáran szállt először tengerre. Hossza 962 láb, szélessége 83 láb és tartalma 27,000 tonna: ha két három-három ezer löberejű göz gép hajtja, 4000 utast tud befogadni. Mindenesetre az egész világnak legnagyobb járműve, de nagysága korántsem felel meg használhatóságának, mert miután az építő társaság gyamolttalansága és hasznavehetlensége miatt megbukott, egy amerikai vette meg, hogy azt a humbug hazájában — mutogassa!

* * *

Ezen rövid kitérés után vizsgáljuk tovább a vízi járművek fejlődési processusát és azon eszközöket, melyek a hajózás haladására befolytak.

A tutaj durva rúdjaiból és a kivájt fatörzs lapátból lassanként a célszerűbb evezők lettek; ezekhez járult később az eleinte egyszerű fadarabból álló kormánylapát, valamint a vitorla, melyet kezdetben valószínűleg gyékényből vagy fakéregből készítették. Egy fatuskó s később egy nagy kő horgony gyanánt szolgált, mit később vas csakány váltott fel. Ehez Anacharsis még egy mást csatolt s ez által megadta a horgonynak alakját, melyet lényegileg ma fel-tüntet. Már Diomedesről állítják, hogy ő Görögországba üresen hazatérő hajóinak fenekét Trója szétzúzott kö-veivel töltötte meg s ezáltal megmutatta, hogy ismerte a súlyteher szükségességét.

Mindezen s még számtalan hasznos fölfedezések

eredményt, másként, mint azon uton, melyre én felhívtam, hogy oda adó akarattal tárgyalva a betérjett törvényjavaslatokat, a nemzet érdekében lehetőleg kihasználja azon időt, mely rendelkezésünkre áll. És az az idő nem sok.

Higgyék el a t. képviselő urak, hogy ha mint mindennek, úgy a parlamenti rendszernek is meg van a maga nemcsak fény-, de árnyoldala is úgy ezen árnyoldalak egyik legjelentékenyebbike az alkotás nehézsége a késedelmezés, a hosszadalmas eljárás. Igaz, sok áll a másik serpenyőben; az üdvös megvitás, a nemzet szellemével való összeegyeztetés és még több más; de bizonyos, hogy a ki épen ezen oldalon neveli a bajt, a tökéletlenséget, hol az úgy is meg van, az nem lesz jó munkás. Ismétlem, a kezdeményezés kötelessége a miénk; nem fog rajtunk mulni; gondos, de azért lehetőleg megkönnyített tárgyalások lehetővé tétele, az az Önök feladata.

Országgyűlés.

A képviselőház ülése január 27-én.

Nagy György beszéde után Kerkápoly pénzügyminiszter egy hosszú s nagy figyelemmel végig hallgatott szónoklatot tartott.

Ennek első részében főleg Ghyecz vádjai ellen védelmezvén magát, azután áttért nézeteinek előadására először arra nézve, mikép véli ő az 1873-iki rendes költségvetésben támadt hiányt fedezni, a rendkívülit a részletes vita alkalmára hagyván, — másodsor: mik tervei a kormányának a jövő pénzügyi politikát illetőleg.

A miniszter sok helyes eszmét pendített meg, a melyeket az ellenzék régóta sürgetett, a kormány azonban mostanáig elhalasztott. A sikon fekvő erdőket ki akarja irtani, minthogy azok mint szántóföldek többet fognak jövedelmezni, de az erdőket nem csupán jövedelem, hanem climaterikus s egészségi szempontból is kell ám tekinteni.

A mivel azonban még a jobboldalon sem nyert tetszést a pénzügyminiszter ur, az a bankot illető nyilatkozata volt.

Beszéde végén a részletes vitába való bocsátkozást ajánlta a háznak. Ezután Hoffmann Pál nézeteit az eddig követett politika felett előadta, közben-közben jó igazságokat mondván oda saját pártjának. A többi között azzal vádolta a kormányt, hogy a codificatió terén semmi sem történt, mire valaki azt a megjegyzést tette: bizony semmi, mert a polgári törvénykönyv is, a melynek kidolgozásával szülő bizatott meg, hasznavehetetlen.

azon időre esnek, midőn a phöniciék az akkor ismeretes világ különböző tájain élénk tengeri kereskedést folytattak. E nagy nép már a szeleket is behatón tanulmányozta, a szélrózsát 12 részre osztotta és ismerte sőt fel tudta használni indiai, arabiai és perzsiai utjain a paszszátszeleket is. Ugy szintén jártas volt a csillagászatban is, a kis medvének egyik csillagát tartotta sarkesillagnak s e szerint számította ki a többi csillagzatok viszonyát.

Az ókor kereskedőhajói laposan voltak készítve, úgy hogy éjjelre kivonszollhatták a porondra. Többnyire nyitottak voltak minden fődélköz nélkül, csak egy árboczfájok volt néhány keskeny, majd mindenik háromszögű vitorlával és egy sor evezőjük. A hadihajókon ellenben több sor evező állt egymás felett; általában mindig sokkal hosszabban, magasabban és hegyesebben s rendszerint a mai gályák alakjára voltak építve, a fődélzetet egy torony magasult fölfelé, melyben a fegyveres készlet állott s igen gyakran hiányzott rólok az árbocoz és vitorla.

Hogyan voltak a hajók még Amerika fölfedezésekor is építve?! Kolumbusnak első útja alkalmával csak három hitvány tengeri járműve volt, melyek összesen csak 120 egyént fogadhattak bé, míg korunk hadihajóin 2000 főből álló legénység és 150 ágyu kényelmesen elfér.

A hajókat régebben magas állványokra (hatalmas kecskelábakra) építették, s aztán ezekről bocsátották vizre a kész hajót. De ez szörnyű nehézséggel sőt veszéllyel levén összekötve, újabb időben rendszerint magas köfalakkal körített medencékben készítik a hajókat, melyeket tetszés szerint lecsapolhatnak és a munka bevégeztével ismét megtölthetnek vízzel, hogy aztán az új vagy megújított hajó csöndesen szállhasson ki a vízre.

(Folytatása következik.)

A képviselőház ülése január 28-án.

A miniszterek közül mai ülésre egyik sem jelent meg. Borlea, a közigazgatás és igazságszolgáltatás s a nemzetiségek iránt követett eljárását a kormányának bírálhatta. Mire - Csáky Tivadarnak rövid felszólalása után — Beöthy János kárhoztatta a kormány általános politikáját. Utántrányi Dániel emelt szót, támogatva a Helfy Ignácz áll beadott határozati javaslatot, a mit — Tarnóczy Gutáv közbejött nyilatkozata után, Csiky Sándor is tett.

V i d é k.

K. Vásárely, 1873. január 29-én.

Olvasó-egyletünk báljafényesen sikerült. Képviselve volt a vidék, úgy a vros összes intelligentiája; a hölgyek öltözetek fényessége és kellemus szeretetre méltósága, még a hideg szénélőt is bámulatra ragadta; — a verseny a bálkirálynői corona elnyeréséért érdekfeszítő volt, szemlélve azt, hogy a báj, szépség, kellem és szeretetreméltóság mint catáz a győzelem sikeréért s azon kis nő hiúság, a „bálkirálynő“ kedves czimének elnyeréséért — mind hasztalan, egyik vagy másik fölényét a harmadik kellemé meghiusította, úgy annyira, hogy e téren az ítélet eldöthetetlen maradt, majd ezt, majd amazt — kinek kinek hogy felfogása hozta magával, — itélték a korona elnyerésére érdemesnek.

Élvezetes báli estélyüket egy kevésbé zavarta egy uracska lagymatag érzése, ki megfellekedve a társadalomban elfoglalt tisztaság illásáról Bachus istenének a kelletinél többet áldozott, — s hogy ebből komolyabb botrány nem fejlődött ki az a bálrendező bizottmány erélyes fellépésének köszönhetően.

A mi a „Nemere“ legközelebbi számában a különfélék rovataiban, a k. vásárhegyi dalárda báira megjelent közleményt illeti, — kérem a tisztelt szerkesztő urat, e lángelméjű ironikus közlenényt, mint valótlan állítást visszavonni.

Akkor a szászok nevezett vezérférfiai legkevésbé sem irtóztak a Talmács és Szelistye fiókszékeiből meg a vármegyéből, még pedig a szász egyetem előzetes megkérdezése nélkül szakított sőt az említett férfiak által sürgetve sürgetett területgyarapodástól.

E tagadhatatlan tényssel szemben közelebről épen a nagyszabeni városi képviselőtestülettel élükön, még pedig ugyanazon Bedeus báró kezdeményezése folytán ki a területgyarapodás dolgában tehetetlen, 1864-ik évi október 8-dikáról kelt kisebbségi különvéleményt legelső helyen aláírta, továbbá azon izgatás mellett, melyet épen azon dr. Teusch superintendens közlönyében folytatnak, ki a megyei földön levő részek után áhítozó kisebbségi különvéleményt sajátkezűleg szerkesztette és aláírta, ugyszintén a törvényhozás és kormányának a királyföldi lakosság egyenjogúsága valóítására irányzott intézkedése megtestesülése ellen ármánykodó szász kerületek nagy részével formasierü keresztes háborút kezdetek Wenckheim Béla báró volt belügyminiszter ur törvényes szempontból azon intézkedése ellen, hogy az ügynek a törvényhozás által eszközözendő végleges rendezéseig Talmács és Szelistye fiókszékek községek politikai jogait Szabenszékekben gyakorolják.

Ámde a szászok szószólói a magyar parlamentet ezen igazságos tényért az erdélyrészi viszonyokat nem ismerő kültöldi lapokban jogtiprásról, erőszakoskodásról és minden képzelhető szörnyüségéről vádolván, és hazánk ellen gyűlöletet szítván, úgy tüntetik fel magukat, mint ha ők lennének az üldözöttek és elnyomottak, holott épen ők voltak mindenha mások elnyomásában a főfőmesterek.

Ritka vakmerőséggel merik Talmács és Szelistye fiókszékeinek a Királyföldhöz tartozását tagadni, holott maga a szász egyetem 1848-ban a magyar miniszteriumhoz és a magyar hongyüléshez intézett és mondott év július hó 4-ről 768 sz. a. kelt fölterjesztésében a föl-tételek között, melyek teljesítéséhez Erdélynek Magyarországgal egyesülése elismerését kötötte, világosan kö-tötötte, hogy a Királyföld közigazgatási és igazságszolgáltatási kapcsán, ide érte Talmács és Szelistye fiókszékeit és a törösvári uradalom közsékeit, mi változás se történjék; most pedig hallatlan merészséggel merik ezt tagadni, noha a szász atyafiak által 1869-ben a mélyen tisztelt képviselőház tagjai között kiosztott emlékirat-féle „megvilágítás“ 30. 31. és 32. lapjain utószülött

László királynak a nevezett fiókszékekről 1453-ban kiadott a szászok által jog és birtok czimen idézett békebelezési levelében világosan áll:

„ad praenominatas Septem Sedes saxonicales perpetue et irrevocabiler anneximus et eisdem Septem Sedibus incorporavimus, imo annectimus et incorporamus, volentes et decerentes, ut praefata Castra, Turris Villae et possessiones omnibus libertatibus, juribus et privilegiis, quibus Civitates, Oppida et Villae dictarum Septem Sedium ab antiquo usque in praesentiam usi sunt et gavis, gaudeant et fruuntur.“

És daczára annak, hogy e két fiókszék községek 1453 óta, tehát 420 esztendőn át Nagy-Szebenből lettek közigazgatásilag és igazságszolgáltatás tekintetében kormányozva, épen úgy, miként a törösvári községek Brassóból, ők mégis merészlik tagadni, hogy azok a Királyföldhöz tartoznak.

Említett békebelezési, de a szász atyafiak által „adományozásnak“ hamisított szándékolt okmányokkal szemben a politikai együtvetartozást kifogásolni merészlik azért, hogy az állam kincstárból jogtalanul kivett tömérdek kárpótlási összeget megtarthassák; de sőt azon vakmerő állításra is vetemednek, hogy ama községek, ámbátor törvény, jog és igazság szerint ugyanazon szabadalmak jogok és kiváltságok birtokában kellett, hogy legyenek, jobbágy községek voltak.

Föltéve azonban, de meg nem engedve, hogy ama községek valaha jobbágy-községek lettek legyen, mely föltézés az előre bocsátottak alapján tökéletesen meg van czáfólva, Nagy-Szeben és Brassó városai, akár pedig a „szász nemzeti egyetem“ nevet viselő valamely conventiculum még ezen esetben sem tehetnének kifogást ama községeknek a Királyföldhöz jogszerű hozzá tartozósága ellen.

Mert valamiként a magyar köztörvényhatóságnak jogában nem áll a hajdan jobbágy községek a politikai képviseltetési jognak az 1848 előtt kizárólag nemes emberekből állott törvényhatósági közgyűlésekben gyakorlásból kizárni; azonként a királyföldi törvényhatóságnak sem áthat jogában valamely községtől e jogot megtagadni, még akkor sem, ha ama község népe jobbágy volt volna, annál kevésbé pedig zárhat ki oly községet, melyek ugyanazon jogokat élvezték, melyeket a szász községek élveztek.

E kérdés jobb megvilágítása és a szászoknak a királyföldi nem szászhitű többség elnyomására irányzott törekvései némi megvilágítása tekintetéből a számtalan más idevágó eset közül legyen megengedve fölemlítenünk, hogy Szabenszék bizottmányi közgyűlésének soha sem jutott eszébe, hogy a Nagy-Szeben Közsomszédságában levő állítólag szintén jobbágy volt Kis-Disznód, (mert szászajku) községnek a szék bizottmányi közgyűlésében a politikai képviseltetés ellen kifogást tegyen. —

Szászhitű testvéreink nem akarják beérni azzal, hogy az ugynevezett nemzeti vagyont, melynek létrejötte, a repartitionalis okiratok tanuskodása szerint épen a nem szászajku többség adózásának köszönhető, mint-hogy Mária Theresia királyné uralkodása idejében a fogarasi uradalomért járt kölcsönösszeg kapunként lett fölhajtvá és ehez képest épen a királyföldi lakosság nem szászhitű többsége által fizetve, mondjuk: hogy nem akarják beérni azzal, hogy e közös vagyont a Királyföld öszlakosságától megvonták, midőn 1850 aug. 22-én, mikor az önkényes erőszak a törvényt és jogot lábbal taposta a szász egyetem, Szászvárosszék, mint jogszerű birtokostárs megkérdezése nélkül (miként erről a néhai Dr. Lészay Dániel szászvárosi követ által a szász egyetem 1871-ik évi május 26-iki ülésben jegyzőkönyvre adott óvás tanuskodik) jöllehet, hogy a meglevő vagyon akkor alig harmadfél százezer forintra ragott, alapítványlevelet határozott, melynek helybenhagyását legfelsőbb helytt a szászokkal sogsorságban volt Gehringer báró államtanácsos által kieszközöltette, egy egész millió forintról ez összeget a szász főkonsistorium rendelkezése alá adják, hogy abból mellözve és megszegve az 1791 október 15-én 5803 sz. a. kelt gr. Teleky Sámuel és Zeyk Dániel által ellenjegyzett, a királyi főkormányzók utján ugyanazon évben 9809 sz. a. kiadott és a nemzeti vagyonnak a királyföldi oskolák és templomoknak valláskülönbség nélkül leendő fölsegélésére fordítását elrendelő udvari leirat*) határozatait, csupán a

*) A nemzeti vagyon kezelési módozatait szabályozó udvari leirat 10-ik pontja szóról szóra így hangzik:

10-mo. Postquam universa nationis debita depurata erunt indulgeri etiam poterit eidem, ut bona etiam in Districtu Fogaras situata, sublatis arendis, ad propriam administrationem certis et sanae oeconomiae commensuratis regulis superstruendum recipiat, proventus vero pro tunc deductis administrationis expensis remansuri inter undecim pu

tisztán szász felekezetű gymnasiumokat javadalmazzák. Ilyformán ők megrövidítették e vagyon egyenjogu tulajdonos társait és részes megalapítóit; mindazonáltal, miként a tetten kapott és menekülni igyekvő gonosz: „fogjátok meg a tolvajt!” kiált, hogy a szembejövőket elámita — mégis ők hallatják a külföldi sajtóban jajiáltásaikat, panaszkodván, hogy a „communisták (volutaképpen azok, kiket ők megrövidítettek) a szász nemzet kifosztására irányzott törvény-javaslaton török a fejüket.

Szász atyániai immár közös vagyonunkat elkaparították, azzal a német (helyesebben: specificus kizárólag szász felekezetű) cultura czége alatt önző érdekeiket mozdítván elő, a szintén jogosult nem szász felekezetű többségtől a közös vagyon szász felekezeti-sítése folytán makacsul megvonják az eszközöket, hogy a hamisítatlan közjónak szentelendő culturérdekeiket hasonlólag fejleszthessék.

Most meg politikai halottakká akarnak minket lealacsonítani, azon levén, hogy a törvényhozásnál a királyföldi lakosság nevében a hírhedt megyesi program alapelveihez szabott külön municipális törvényt eszközöljenek maguk számára.

Az elősoroltak alapján legalázatosabb kérésünk: méltóztassék a nagyméltóságú öszminiszterium a királyföldi törvényhatóságok rendezésére vonatkozó törvényjavaslat megállapításánál tekintve azt, hogy a szászjku képviselők már megválasztásuk előtt arra kötelezték magukat, hogy ők nem fogják illető választó kerületek összlakossága érdekeit képviselni, hanem a megyesi ugynevezett nemzeti program szellemében csupán a korszellem által amugy is elítelt megcsökönösödött, kiváltságoskodó szász különkívánalmak teljesítése körül fognak fáradozni, ezen képviselőknek a Királyföldnek ezental is kiváltságos különállása kieszközlésére irányzott egyoldalú információt a kellő korlátok közé visszautasítani és meg nem engedni, hogy a maroknyi szász-ság hatalommal birjon, melylyel a királyföldi lakosság többségét jövőben is a politikai jogok élvezésétől megfoszthassa; méltóztassék a nagyméltóságú öszminiszterium egyetértőleg a törvényhozással általánosán érvényes köztörvényhatósági törvényt, a falusi községeknél a szab. kir. városok községeivel természetellenes törvényhatósági kapcsolatból egyidejűleg kikebelezésével, azonnal a Királyföldre is kiterjeszteni; mert mi nem kívánunk külön, hanem egyenlő jogot.

Suwaloff küldetésére vonatkozólag a „D. Ztg.” ugy értesül, hogy közte és az angol kormány között a következő pontozatok fölött folyt a tárgyalás és alkudozás.

1. Hogy Afghanistan a két hatalom birtoka között semleges területnek tekintessék. 2. Hogy a most nevezett tartomány meglehetősen ismeretlen határai pontosan jelöltessenek ki. 3. A határmegállapítás tekintetéből Anglia részéről az indiai alkirály, Oroszország részéről pedig Turkestan főkormányzója bizassék meg. 4. Az előmunkálatok kölesönösen felülvizsgálándók lesznek s a tulajdonképeni határszabályozás egy vegyes bizottságra ruháztassék.

Suwaloff kikötötte kormányának helyben hagyását e pontozatokra nézve, a mi valószínűleg be is fog következni. — Anglia már birja az előmunkálatokat e tárgyra vonatkozólag — állítólag még 1869-ből s most ezeket veendi kiindulási pontul.

A spanyol udvar 9 napi gyászt vesz fel az elhunyt Napoleon császárért. A senatus 20-ki ülésében több kérvények nyújtattak át republicanus radical senatorok által, a rabszolgaság eltörlése mellett.

Berlinben a követek házának 25-ki ülésében azon kérdés folytán, hogy vajjon mindegyik államminister, saját szakkörétől eltekintve, az állam politikáját is képviseli-e hg. Bismarck kijelenti, hogy mindegyik ministert kétoldalulag kell tekinteni, még pedig saját

szakköri működésének, s az özministerium politikája támogatásának tekintetéből. A legutóbbi eseményekre vonatkozólag kiemeli, hogy az ömunkaterhe igen nagy volt, mivel egészsége gyöngébbélett, s Abekenben egy jelentékeny segélytársa halt meg A birodalmi kanzel-lár s a porosz miniszterium közti viszály lehetetlen. A porosz cabinetbeni magmaradásaazt bizonyítja, hogy ő a miniszteriumot támogatni akaja, s csupán a formai felelősség egy részétől akarja magát fehaentetni. A miniszteriumban beállott változásnál rányváltozásra gondolni sem lehet; s ilyet ő soha sen engedett volna meg.

Az olasz belügyminiszter a Napoleon elhunytá alkalmából bizonyos tartományi s községi tanácsok által hozott határozatokat meg foga semmisíteni.

Tanügy.

(Műfaragó mester.) A Hosszafaluban lévő állami felső népiskolához Kupcsay János, Münchenben élő magyar szobrász műfaragó mesterré és rajztanárrá nevezetett ki. Ugy tudjuk, hogy hazánkban ez az első tanintézet, melynél a műfaragás gyskorlatilag tanítottatik.

A kormánynak és ezen intézet tervezőinek a volt czéljok ezzel, hogy egyfelől az izlés fejlődésére hassanak, mindenek felett azonban egy eddig nálunk nem gyakorolt, de igen háládatos ipanagat meghonosítsanak.

Köznépünk minden tanulás nélkül is sok jelét adta faragási ügyességének. Menyire fejthető az rendszeres tanulás mellett!

Fölvivjuk az országrész értelmiségét e jelentékeny közmívelődési mozzanatra. Figyelmeztessék arra környezetüket és buzdítsanak mentől több tanulót ezen intézet látogatására, a melyben azon kívül a felső népiskola minden tantárgya s az ipari szakösmeretek önállóság is előadtnak.

Fölvétetnek az elemi népiskolát szabályszerűleg végzett növendékek, nemzetiség-különbség nélkül. Előadási nyelv a magyar.

(Az ő felsége) elnöklete alatt jan. 24. tartott miniszteri tanácsban a határörvidéket illető több kérdés is tárgyalatott. És pedig a határörvidéki erdők jövedelmének elhelyezéséről szóló javaslat, valamint a védrendszerek a határörvidéken eszközözlendő módosítását illető terv.

(A császár) által Csehország részére szentesített országgyűlési választási szabályzat az érseket a püspököket s kanonokat a választási jogtól megfosztja s ez által a eseh nagybirtokosság alkotmányhü többsége biztosítva van.

(A magyar püspöki) kar tagjai közül többen jelenleg Pesten conferentiákat tartanak. Az első ily értekezlet a napokban volt a hgprimás elnöklete alatt. A hgprimás ő felség által fogadtatott.

(Az osztrák) hirdetési bélyeg a budgetből ki fog töröltetni s miniszteri rendelet által fog megszüntettetni.

(Mint hírlík), a pénzügyminiszter az első magyar biztosító társulattal az államhivatalnokok nyugdíjalapjának átvétele iránt előzetes szerződést kötött.

(Az országházból.) Nemes Nándor gr.: Van szerencsém Felső-Fehérmegye közönségének kérvényét benyújtani, melyben az ugynevezett Királyföld különállását megszüntetni kéri. (Helyeslés). Teszi pedig ezt azon rendithetlen meggyözödsébből, hogy a t. háznak nem lehet szándoka jövőre is a Királyföld lakosait elkülönítve hagyni, mintha ezek nem épen ugy tarthatnának igényt egyenjogúságra, mint hazánk bármely más német ajku polgárai, vagy mintha azok hivatva, vagy mondhatom, kárhóztatva lennének, ugyszólván hazánk összesítésének lehetetlenségét elleneink kárörömre továbbra is fentartani. (Általános helyeslés.)

A miért is a t. háznak különös pártfogásába van szerencsém ajánlani a kérvényt. (Általános helyeslés.)

A kérvényi bizottságnak adatik ki.

(Az itteni reformátusok bálja) holnap, februar 1 napján fog megtartátni az 1 sz. vendéglő nagy termében. A rendezőség fölkérése következtében figyelmeztetjük a közönséget ezen jó hírben álló mulatságra, melynek jóvedelme a legnemesebb czélra fordittatik.

(Berzenczey László emlékirata.) Ugy vagyunk értesülve, hogy Berzenczei László emlékiratain dolgozik, a melyekben terjedelmesen fogja elbeszélni 1848—49-iki kormánybiztosi működését, nemkülönben számüzöttsége hányatásait. Egy kötetre való kézirat már rendezve van és közelebből sajtó alá kerül.

(„Vasmegei figyelő”) czim alatt Szomhathelyt egy új vegyes tartalmu hetilap jelenik meg Rusa Kálmán szerkesztése mellett.

(Brassótól Segesvárig) Berzenczeynek volt gyorskocsi üzlete; most Ludwig is megkezdvén, Berzenczey megszüntette a magáét. Ki kell fejeznünk ez alkalomból hogy Berzenczey gyorskocsija valóban megfelelt nevének; nem volt gunyja a gyorsaságnak, mint annyi más így nevezett intézet. Személyzete is udvarias és szolgálatkész volt a közönség iránt.

Ludwig jó hírben álló polgára Brassónak. Óhajtjuk, hogy ezen vállalata is jó hírnévnek örvendhessen.

(Ki a germanisator.) Zarándmegye még most is régi, latin feliratu pecsétnyomóját használja. Nagy sokára észrevették ezt a belügyminiszteriumban s dicséretes buzgalommal hosszú levelet írnak, melyben meghagyják, hogy mivel Magyarországon törvény által van biztosítva a magyar nyelv joga, tessék a pecsétet sutba dobni és — magyar köriratut csináltalni. A dörgedelmes levelet bele pakolják aztán egy levélborítékba melyen ezen szavak állanak felül: „Miniszterium des Innern. Amtlich.“

(A VII. bíraló) bizottság Máday Sándor fogarasi választását februar 4-én délután 3 orakor fogja tárgyalni.

(Idősb Péterffy Károly) m.-vásárhelyi ny. ref. lelkész, azelőtt m.-vásárhelyi ref. tanár, később tordai pap s a magyar tud. akadémia lev. tagja, közhasznu munkás élete 83-ik évében f. évi jan. 23-án M.-Vásárhelyen elhunyt.

(A zajzoni bírói) választásra vonatkozólag megemlítjük, hogy mikor a gazdák a bírói választás ellen óvást tenni a főbíró urhoz személyesen bementek, ez öket nagyon kegyesen fogadta és azon vigasztalással bocsátotta el, hogy új bíró választást fog rendelni. Most pedig kedden, midőn a gazdák megjelentek a főbíró urnál azon kéréssel, hogy mentől hamarabb rendeljen új bíró választást, mert az ingerültség roppant nagy: a gazdákat a főbíró az inspectorhoz utasította, az inspector viszont a főbíróhoz, s így küldögették öket Pontiusból Pilatushoz. Egyszersmind felmutatták azon okmányokat, melyek a megválasztott bírónak compromittaltását eléggé bizonyítják, de ezek nem méltattak figyelemre sem.

(A helyi magyar casino) bálja f. hó 26-án tartatott a „Nr. 14” dísztermében. A bál minden tekintetben sikerültnek mondható, városunk közönségének színe-java jelen volt, ámbár sokan hiányoztak, kiknek illet volna megjelenni. Mindvégig az egész társaságon derült hangulat uralkodott, mit a tűzértáncz alkalmával a hymnus játzsása a lelkesültségig fokozott.

(A helyi rom. kath. fő-gymnasiumi) ifjusága január 30-án zártkörű tánczestélyt rendezett, mely az idei farsang fénypontjának mutatkozott.

(S.-Szt.-Györgyön) az olvasó egylet javára februar 6-án bál rendeztetik.

A jól trágyázott, jól mivelt földbe a mély szántás nem esik a marhának nagyobb terhére, mint a sovány roszul miveltbe a földszini szántás. Most nagyon földszint kell szántanod, mivel nagyon is vékony trágyázásodat ha mélyen eltemeted, s ez által ugynevezett „vad-föld“-et hozasz fölszínre, s ebbe veteményezel — mi gabonád se lesz.

De ha földednek még oly vastag trágyát adsz, s még oly mélyen szántasz: bizonyos lehets benne, hogy egy pár évi ily kezelés mellett sürűbbek lesznek kalangyáid. A

mély szántás által nagyobb földtömeg tevődik ki a lég átjárásának, nagyobb tömeg tevődik termővé. Az ily földbe vetett plánták gyökerei mélyebben hatván a földbe, nem oly könnyen érzik meg a szárazságot, de esős éveken nem is oly könnyen düllek meg.

Hogy igavonó marháidat kijavítva eladod, s gyengébbeket vész helyettők: ezt nem helyeslem. Ily változtatás után jó marhával ritkán dolgozol. Rosz marhával jól szántani nem lehet, s mint ilyennel még a kijavított földben is földszint kell szántanod, vagy nem is szántanod.

Ha ezt a keresetmódot akarod üzni: akkor légy marhakupez, de ne földmives.

Na édes fiam! ezek észrevételeim általod felhozott nézeteidre.

Hogy tanácsadásommal szerencsétlensek, oly kíváncs, melyre atyai kötelességem úszintén nyilatkozni.

Az én multam a jelent figyelembe véve, s ezekből a ti jövedőteket következtetve, tiszta öntudattal — de fájdalmas szívvel ki kell mondanom, hogy „tagosítás nélkül sem ti sem hozzátok hasonló kis birtokosok a szántás-vetés

s ezzel összekötött marhtenyésztésből meg nem élhettek, bár mi szorgalmat fejtsetek ki.“

Földmivelt állattenyésztés nélkül nyereséggel folytatni nem lehet. Földet lehet kinozni trágya nélkül is, de ebből jövedelemre nincsmit számítani. Trágya készítésre marha kell, s nyári istálló. Ezek pedig takarmány nélkül ki nem vihetők. Nyári takarmányt csak ugar megszüntetése után lehet termeszteni.

Én is tartok s tarttam eleitől fogva egy pár jó vérű, kemény kötésű, ugynevzett „székely faj“ kanczát; egy pár szép tehenet, vidékünk és legelőnkhez szokott zömök fajból; hoztam a mezősegtől több versen ezimeres teheneket; vettem egy-egy pár jó aj koczát is. De ezek szaporodásai után sem egy értékes cskót vagy borjut nem neveltettem. Jó faj sertéseim is a helység rosz faj kanja miatt elajlasodott; s mi volt mind ezeknek az oka? A tagosítás nem léte miatt közös csorda.
